04 — CORE TRACK #3

Educational Technology Specialist

Education Technology

Why This Path Fits Your Profile

An Educational Technology Specialist merges creativity with technology to enhance learning experiences, aligning with the Investigative and Artistic traits. This role allows for innovation in teaching while supporting educators and students.

CORE TOOLS & SKILLS

- learning management systems
- educational software
- data analysis tools
- presentation software

WORKPLACE CONDITIONS

- educational institutions
- remote work options
- collaborative teams

MARKET OUTLOOK

Projected Growth +15% over the next decade, as educational institutions increasingly adopt technology in their curricula.

Entry Range	\$50,000 – \$60,000
Senior Range	\$70,000 – \$90,000

A DAY IN THE LIFE

- 09:00 AM Develop and implement new educational technologies for classrooms.
- 12:00 PM Train teachers on how to effectively use technology in their lessons.
- 03:00 PM Evaluate the effectiveness of educational programs and tools.

05 — INTEGRATION

Navigating Your Matrix

Understanding the intent, framework scope, and optimal application of your career match findings.

The fields mapped out above represent your calculated top matches, derived from your Holland code and current industry demand. These trajectories show where your day-to-day workflow is likely to feel most natural and engaging.

- **Matches Are Not Restrictive Boundaries**

These recommendations should not limit your ambitions. Use them as structured benchmarks to guide exploration — many adjacent fields share a similar profile.

- **Explore Every Domain in Detail**

Take time to look deeper into each recommended track — talk to people already in the role, and see how it actually feels day to day.
